The growth of the market is attributed to the increasing adoption of digital pathology to boost research laboratory potency, rising prevalence of cancer, growing applications of digital pathology in drug development and companion medicine, easy consultation and increasing initiatives by governments and business players. Introduction of affordable scanners for pathology practices, personalised drugs and integration of laboratory info systems (LIS) and digital pathology systems are expected to supply important growth opportunities for makers in the coming years. The marketplace for anatomic pathology worldwide can doubtless rise at a gentle pace of 6.5% during the period from 2017 to 2025, predicts a report by Transparency Market Research. At this pace, the market is projected to clock a price of US\$30,314.5 mn by 2025-end from US\$17,318.0 mn in 2016.
