### INTRODUCTION

The Journal of Biology and Today's World is a leading academic research journal, which publishes scholarly articles in the field of medicine and biology. This journal publishes the finest peer-reviewed research in all aspects of medicine and biology keeping in mind the originality, importance, accessibility, timeliness, elegance, and startling conclusions.

Due its broad scope, a diverse set of topics, such as genetics, biotechnology, biochemistry, microbiology, cellular & molecular biology, and disease biology, are covered under the aegis of this journal. Additionally, the journal also provides rapid, authoritative, and insightful reports and interpretation of topical and future trends in science.

Due to the journals wide scope and quality in Strict Double Blind Peer Review Process, the Journal is running successfully since 9 years with monthly issues. For the year 2020 a special issue has been coined on the trending CoVid-19.

As we are getting several articles for publication we are following certain criteria in accepting them. Not all the articles submitted will get published. In the first step it will undergo Preliminary Quality Checkup, where the article is checked whether it is plagiarized or published anywhere else or suitable for the journal scope. Later the manuscripts are assigned to the Editors and Reviewers to undergo Peer Review Process. Here upon the choice of an author sometimes we undergo Rapid Peer Review Process also. According to the journal policy we undergo double blind policy where we will not reveal the authors and reviewers details to each other.

### *Journal of Biology and Today's World covered below subjects in all published types*

**Biological sciences:** Genetics, Biotechnology, Biochemistry, Microbiology, Cellular & Molecular Biology, Bioengineering, Nano biotechnology, Biosensors, Bioinformatics, Animal Biology, Plant Biology, Biophysics, Ecology, Agricultural Technology, Tissue Engineering and Application of other sciences in biology.

**Medical sciences:** Cardiovascular, Anesthesiology, Anatomy, Allergy, Critical Care, Urology, Surgery, Rheumatology, Rehabilitation, Radiology, Toxicology, Oncology,

Ophthalmology, Neuroscience, Infectious Diseases, Pathology, Pharmacology, Public Health, Human Physiology, Clinical Psychology, Immunology, Hematology, Food and Nutrition Sciences, Epidemiology, Endocrinology, Veterinary Sciences, Pulmonology, Pediatrics, Parasitology, Otolaryngology, Orthopedics, Nanomedicine, Dental Science, Dermatology, Virology, Hepatology, Obstetrics and Gynecology, Geriatrics, Gastroenterology, Application of other sciences in medical sciences.

### *Articles published in 2019*

Entomopathogenic Fungi Collected from Sunn Pest, *Eurygaster integriceps* Puton (Hemiptera: Scutelleridae), Overwintering Sites in Central Iran [1].

Comparison of Thioglycollate Broth with Liver Extract (BQ Vaccine Medium) with Traditionally Used Culture Media for Mass Scale Production of *Clostridium perfringens* Type D [2].

The Relation between Hyperparathyroidism and Premature Atherosclerosis in Haemodialysis Patients at Minia University Hospital [3].

Comparative Modeling, Virtual Screening and Docking of CCR5 with Diverse Libraries: An Initiation towards Rational Drug Design to Identify a New Chemical Entity to Treat HIV [4].

Machine Learning in Healthcare Data Analysis: A Survey [5].

Metastatic Rhabdomyosarcoma of the Retroperitoneum.

Oposoclonus Raccoon Eye in Fatal Metastatic Neuroblastoma.

The Relation between Estrogen-positive Receptor in Breast Cancer (ER+) and Obesity in Jeddah.

Antiproliferative Potential of Lithium Salts against Hepatocellular Carcinoma Cell Line.

Cerebellar Ataxia in HIV Patient due to Suspected Efavirenz Associated Neurotoxicity.

Therapeutic Potential of Fibroblast Combined with Platelet-Rich Plasma on Burn Skin Wound Healing.

According to importance of researches in biological & medical sciences, Accuracy in selection of high-quality journal in these fields is essential. Journal of Biology and Today's World with the Supreme system that provided by the Lexis Publisher, promised to the academic world, do efforts to having a qualify journal. Also, due to the more important role of biomedical research in living life, it was necessary with stringent quality control parameters, we can publish more accurately researches. Our other important goal is the establishment of peaceful and friendship between peoples from various nations; Experts from

different countries that help us to control this journal is a good evidence for this purpose. No matter who are you for Journal of Biology and Today's World and exactly editorial process will exactly done for all submissions. Decision on all submitted manuscripts is independed to Nationality, academic degree and any relations to journal.

Also we are available through social media LinkedIn, Twitter posting daily updates and easily available to the researchers. In the end we would like to thank our Reviewers for their constant effort and timeless effort to our journal.
